

## BUCERIUS LAW SCHOOL in Hamburg

The building for the Law University impresses by its modern architecture and big glass facades offering every student an optimal learning atmosphere in the reading rooms. SPITTLER additionally improves this positive learning atmosphere by their intelligent lighting systems. As we had been requested to integrate an illumination into the architecture conforming to standards, we have integrated our ultra-flat luminaire series SL624 in the concept. The free standing luminaires became an integral component of the furniture and guarantee an optimal illumination of the work surface. The lighting technique consists of

4 x TC-L 55 Watt compact fluorescent lamps and micro-prism optics.
